COMMUNITY MEETING

November 2022

Class Environmental Assessment for Minor Transmission Facilities Essex Battery Energy Storage Project

PR Development LP, an affiliate of Potentia Renewables Inc., is initiating a Class Environmental Assessment for Minor Transmission Facilities ("Class EA") (Hydro One, 2022) to construct the Essex Battery Energy Storage Project ("Essex BESS" or "the Project") in the Municipality of Lakeshore. Essex BESS is designed with the intention of addressing the growing electricity needs of southwestern Ontario. The Independent Electricity System Operator ("IESO") is forecasting a need for 4,000 Megawatt ("MW") by 2030 and is in the process of administering various procurement programs to address this need.

The proposed Project is a battery energy storage facility sized to provide up to 350 MW over four hours (1,400 Megawatt-hours). It occupies approximately 35 acres of land within the parcel located at 2873 Lakeshore Road 245. A map of the Project area is provided at the end of this Notice. The Project will connect to two 230 kilovolt lines within Hydro One Networks Inc.'s transmission system. The Project is subject to the Class EA in accordance with the *Ontario Environmental Assessment Act*.

We invite you to join our upcoming community meeting to learn more about the proposed Project and to speak directly with members of our Project team.

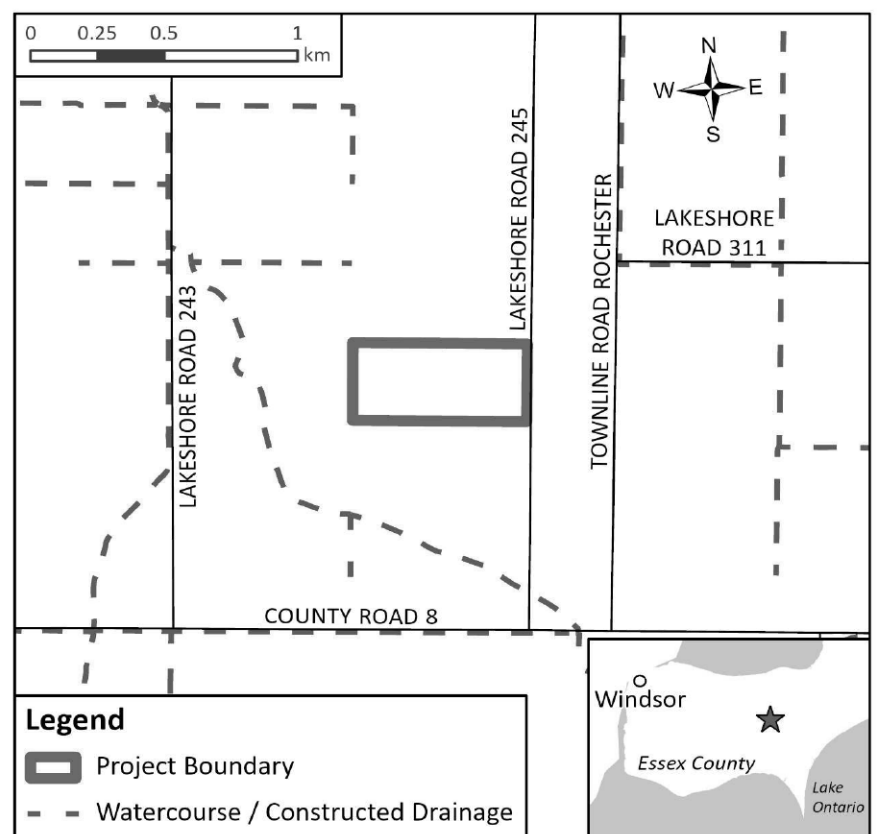

Please join us on:

Thursday, December 8, 2022
5:00 – 8:00 PM
Maedel Community Centre,
Huron Room
25 Gosfield Townline West
Town of Essex

We welcome your comments and questions regarding this Project. Should there be any update to the Project information provided, we will ensure you are promptly informed. Contingent on the outcome of the Class EA process, construction could begin as early as the spring of 2024 and is expected to be completed by the fall of 2025.

If you have questions or would like any additional information about the project, please contact:
